

# **MONTREAL DESIGN DECLARATION**

Issued at the 2017 Montréal  
World Design Summit

Adopted: 24 October 2017, Montréal (Canada)  
Updated: 21 January 2019

The first Design Summit Meeting (DSM) marks the first international convening of the design community, across a broad spectrum of design disciplines, together with a strong array of international organisations, with cultural, economic, environmental and social perspectives. The design organisations present represent hundreds of thousands of designers from around the globe. The international bodies represent governmental, IGOs, NGOs and private and civil sectors of society worldwide.

Thanking the organisers of the World Design Summit for having convened this meeting, we have come together,

To express a shared view of the crucial role of design and the great responsibilities of designers; and

To affirm the fundamental role of design in creating and shaping the world around us, now and in the future.

We, the undersigned international representatives of professional designers, architects, urban planners, landscape architects and other design-related disciplines,

In the presence of international organisations representing and relating to public, private and civil sectors of society concerned with design and or impacted by design;

**Cognisant** of the diverse range of contexts, both formal and informal, where design has an impact; Mindful of the immeasurable value of local and traditional knowledge for appropriate and innovative design solutions;

**Sentient** of the demand of communities, large or small, local or global, for decent living conditions and which design can help address;

**Recognise** the need for strategic leadership on design matters at local, regional, national and international levels and with this, the need for governance models, political agendas and policy to take design into account;

**Recognise** the need for sufficient fiscal and human resources and capacity;

**Acknowledge** the intrinsic capacity of design to serve as an agent of change and a source of creative transformation;

**Acknowledge** the fundamental and critical role of design to create a world that is environmentally sustainable, economically viable, socially equitable, and culturally diverse;

And **confirm** the value of working in a collaborative, holistic and integrated way to foster design of common benefit.

## VALUE OF DESIGN

**DESIGN IS** the application of intent: the process through which we create the material, spatial, visual and experiential environments in a world made ever more malleable by advances in technology and materials, and increasingly vulnerable to the effects of unleashed global development.

**Design is a driver** of innovation and competition, growth and development, efficiency and prosperity.

**Design is an agent** for sustainable solutions created for people and supporting the planet on which we rely.

**Design expresses culture.** Designers have a particularly potent role in making, protecting, nourishing, enhancing and celebrating cultural heritage and diversity in the face of globalisation.

**Design adds value** to technology. Through consideration of human perspective and interface, and by focusing on individual interaction first, design bridges technology with human needs.

**Design facilitates change.** Design enables all aspects of society, public and private, governmental and non-governmental, civil society and individual citizen, to transition through change (i.e. austerity, demographic changes, shifts in services) to deliver a better quality of life for all citizens.

**Design introduces intelligence to cities** as a foundation for better communications, improved environments, enhanced quality of life and more prosperous local communities.

**Design addresses resiliency and manages risk** through comprehensive research, robust methodology, prototyping and consideration of life-cycle consequences.

**Design fosters development** of SMEs in general and the creative industries in particular.

**DESIGNERS ARE** professionals, who, by education, outlook and experience, are capable of developing new, interdisciplinary solutions to improve quality of life.

## CALL TO ACTION

**Recognising** that design leadership is a key to the delivery of sustainable solutions and implementation of design methodologies that contribute to a more sustainable future,

We seek to collaborate with and embrace the language of governments, businesses, NGOs and communities throughout the world,

### Calling for:

**Design Advocacy:** more effective communication of the meaning and value of design and understanding of the design process.

**Development of Design Metrics:** collection of data and establishment of effective measures to better enable the evaluation of the impact of design, thus demonstrating the strategic value of design within organisations and businesses and in serving the public good.

**Development of Design Policies:** to be applied at the local, regional, national and international levels.

**Development of Design Standards:** support of professional design communities, the development

of design industry infrastructures and development of standards, codes, covenants, best practices, legal protections and certification programs.

**Enhancement of Design Education:** support for educational institutions, methods and processes specific to design education, design research and lifelong learning and capacity building for designers.

**Responsive Design:** design that is responsive to the degradation of the physical, social and cultural environment, and natural ecosystems and the threats and risks caused by global change, industrialisation, rapid urbanisation and unfettered consumption, profoundly affecting quality of life and impacting sustainable economic growth.

**Responsible Design:** recognition, by designers, of the impact resulting from their practice, whereby designers must be conscious of their enormous capacity to be constructive, as well as destructive, in the interventions they make. Designers share in the responsibility of refocusing from human consumption to the enhancement of human life.

**Vigilant Design:** in a world increasingly impacted by machine learning and artificial intelligence, designers must help ensure that the impact of algorithms and technology are ethical and inclusive of social, cultural and ethnic diversity.

**Recognition of Design:** by leaders, decision-makers and influencers across all sectors of society, of the value of design, and need to foster and implement design for the greater common good.

We therefore, **express our intent:**

**To work** in concert, collectively, in groups and as individual entities, and with additional stakeholders, to establish an ongoing, structured process of collaboration, as manifested here in this Declaration, including future World Design Summit Meetings;

**To collaborate** with other efforts with shared objectives: including the UN 2030 Sustainable Development Goals, New Urban Agenda, Paris Climate Accord and the UNESCO Convention on the Protection

and Promotion of the Diversity of Cultural Expressions, and others;

**To develop** a world design agenda, whereby this Declaration is a first invitation to join in common cause to support design;

**To collectively initiate** projects fostering and advancing the role, responsibility and value of design;

**To mandate** the Design Summit Meeting Steering Committee, with the active collaboration of Summit Meeting participants, to develop the mechanisms required to ensure continuation of the process initiated by this Declaration, drafted by and for the international design community, to achieve the desired outcomes. The proposed mechanisms will be submitted to the signers of this Declaration for approval;

**To influence and support** decision making, locally and globally, on policy and resources;

**To give** design an effective, united voice;

**To inspire designers**—too long the servants of producers—to better serve humanity as the ambassadors of the end-users: the citizens of the world.

**All people deserve to live in a well-designed world.**

# ANNEX: PROJECTS

The projects listed below reflect a broad spectrum of possible collaborative efforts. All promise value. Undertaking any of these projects requires resources, negotiation, coordination and management. A process will be created to determine the projects to be launched, and therewith their sequencing and implementation. Projects will be undertaken by coalitions of interested participants matched with partners and sponsors. Results will be shared and presented at future convenings and events under the umbrella of the Design Summit Meeting.

## METRICS—MAKING THE CASE

**Project 1.** Develop, collect and circulate indicators, as in metric measures (both quantitative and qualitative), for evaluating design impact (economic, environmental, social and cultural).

**Project 2.** Develop, collect and circulate case studies demonstrating design impact, utilising metric measures.

**Project 3.** Communicate value of design to target audiences through presentation of case studies.

## CREATING A COMMON LANGUAGE

**Project 4.** Develop a comprehensive and inclusive taxonomy of design, architecture, landscape architecture, urban design and planning and related disciplines that offers shared definitions that can be understood by designers, government, industry and the public.

**Project 5.** Conduct a global mapping of national and international design organisations, policies, and regulations; establish a database and clearing house accessible by governments, industry and the public.

## POLICY AND GOVERNMENTS

**Project 6.** Collect and examine models of Design Policies (national, regional, local); develop platform, for both physical and virtual exchange, for discussion and dialog with governments; conduct periodic conferences aimed at government officials; establish clearinghouse and database; describe formats for implementation of advanced design methodologies within government, government services, and public procurement.

**Project 7.** Establish a standing international advisory group, composed of DSM aligned entities, to serve as a resource for government, industry, business, NGOs and other stakeholders.

**Project 8.** Establish dedicated mechanisms for ongoing, structured collaboration between DSM and internationally recognised UN 2030 Sustainable Development Goals, New Urban Agenda, Paris Climate Accord and the UNESCO Convention on the Protection and Promotion of the Diversity of Cultural Expressions, and similar frameworks.

## EDUCATION AND RESEARCH

**Project 9.** Foster development, recognition, support and funding for design education and research worldwide, recognising the diversity of circumstances and opportunities due to local social, economic, environmental and cultural contexts.

**Project 10.** Collect, develop and share new formats, methodologies and curricula for design education and capacity building with enhanced focus on sustainability, degradation of the environment, climate change, impact of globalisation on cultural diversity, social responsibility and the need to temper consumption.

**Project 11.** Establish clearinghouse mechanism for student and faculty exchanges, internships and research projects and opportunities.

**Project 12.** Promote models of accessible lifelong learning for designers.

## DOING AND DEMONSTRATING

**Project 13.** “World Design Challenges“ Conduct projects demonstrating the potential for design, across the spectrum of disciplines and addressing specific social, cultural, environmental and economic challenges.

*Example:* A project applying service design approach to coordinating public services (healthcare, transit, etc.) on a regional level.

*Example:* Structured collaboration with initiatives coming out of Habitat III to address needs of low-income populations to showcase power of design to help upgrade self-built informal settlements.

*Example:* Showcase long-term economic and social value of highest caliber infrastructure and building projects in terms of sustainability and resilience.

**Project 14.** Show role of design in enhancing and celebrating cultural diversity by sharing examples and establishing formats for promoting utilisation of design for these purposes.

## DESIGN COMMUNITY—STANDARDS

**Project 15.** Collect models of effective design community leadership; support formats protecting designs and the rights of designers; share experiences and resources.

**Project 16.** Enhance and seek standards of professionalism, social responsibility, ethical practice.

**Project 17.** Adopt and integrate worldwide formats affecting design competitions, public tenders and assurance of design excellence in public service, procurement and construction projects.

**Project 18.** Support integration of certification and accreditation across design disciplines.

**Project 19.** Establish overarching tools to advise and commission private and public projects. Example: International Landscape Covenant

## CREATING A COMMON CAUSE

**Project 20.** Generate support for a world design agenda through distribution and statements of support for the Montréal Design Declaration.

# SIGNATURES

This Declaration is signed on this day, 24 October 2017, in Montréal, Canada, by:

## DESIGN SUMMIT MEETING STEERING COMMITTEE

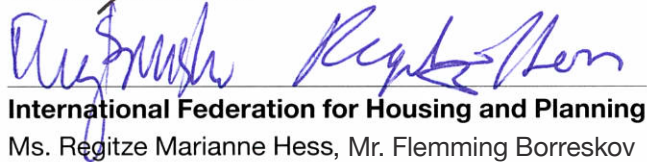

**Mr. Alain Dufour**  
Secretary General, Design Summit Meeting  
Chair of the Summit Meeting Steering Committee

**World Design Summit Organisation**  
Ms. Marie-Claude Parenteau-Leboeuf  
Chair of the Board of Directors of the World Design Summit Organization

**International Council of Design**  
Mr. David Grossman

**International Federation for Housing and Planning**  
Ms. Regitze Marianne Hess, Mr. Flemming Borreskov

**International Federation of Landscape Architects**  
Ms. Kathryn Moore

## INTERNATIONAL ORGANISATION SIGNATORIES

**Architecture Sans Frontières International**  
Mr. Xavier Codina

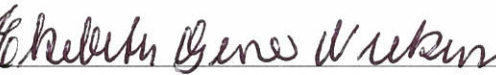

**The Bureau of European Design Associations**  
Mr. Bart Ahsmann

**Commonwealth Association of Planners**  
Ms. Kristin Agnello

**Confederation Française pour l'Habitat, l'Urbanisme, l'Aménagement du Territoire**  
Mr. Thierry Lafont

**Cumulus International Association of Universities and Colleges in Art, Design and Media**  
Ms. Elsebeth Gerner-Nielsen

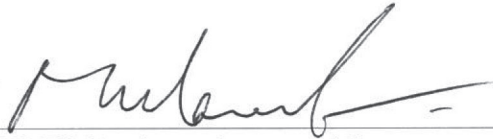

**Design Research Society**  
Mr. Peter Lloyd

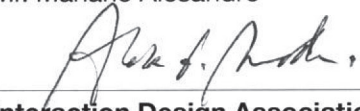

**Design for Social Innovation and Sustainability Network**  
Ms. Carla Cipolla

**Global Planners Network**  
Ms. Eleanor Mohammed

**INDEX: Design to Improve Life**  
Mr. Mariano Alesandro

**Interaction Design Association**  
Mr. Alok Nandi

**Service Design Network**  
Mr. Jesse Grimes

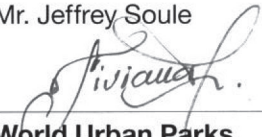

**International Union of Architects**  
Mr. Thomas Vonier

**World Green Building Council**  
Mr. Jonathan Laski

**World Urban Campaign**  
Mr. Jeffrey Soule

**World Urban Parks**  
Ms. Sandra V. Murillo-Morales

**IN THE PRESENCE OF:**

Ms. Jyoti Hosagrahar  
Director, Division of Creativity, Culture Section **UNESCO**

Mr. Wataru Kawasaki  
Program and Planning Officer, **UN-Habitat**

Ms. Martina Otto  
Head of Cities Unit, **UN Environment**

Ms. Nancy Pollock-Ellwand  
ISCCL Vice-President North America, **ICOMOS**
